Simulated observations (emulated fake-device trials); no hardware data.
width n
share of tasks
two-qubit gates
density
compiled depth
density
light-cone fault weight λ_LC
density
observable weight
share of tasks
|μ| — oracle (labels only)
share of tasks
noise components
readout weight λ_RO
gate share of λ_LC (rest: idle)
counts
development:
88 tasks (0 failed)
44 base circuits
6 designs/half, r = 60/half
confirmation:
58 tasks (0 failed)
29 base circuits
6 designs/half, r = 60/half
noise-composition study:
18 tasks (0 failed)
3 base circuits
6 designs/half, r = 60/half
development
confirmation
noise-composition study (noise panel only)
